Audit and Security Automated Tools:

As part of DataGuardZ services, it includes a suite of the latest audit and security vulnerability assessment tools necessary to identify IT risks within your environment. As a result, your organization does not have to purchase such tools thereby potentially saving thousands of dollars between license and maintenance fees. The need to use automated tools is to increase coverage and accuracy when assessing the targeted system or platform.

* Including 40% other benefits* (Medical/Dental/Life insurance, 401K, employee stock purchase, etc..)
